

Presentation Day Guide

During your class period on Tuesday, June 9. Live or pre-recorded is accepted. All deliverables are due by 11:59 PM Monday, June 8 on Google Classroom. You worked hard; every group member must attend.

Format + Requirements

- 8-12 minutes total
- 5-10 slides maximum
- All members speak or appear on video
- Graphs include visible source citations
- Each member presents their section
- Live or pre-recorded accepted
- Professional presentation expectations

What Your Presentation Must Cover

- Driving question and final claim
- Real graphs with visible source citations
- Equations and calculations shown clearly
- Graph features interpreted in context
- Predictions and limitations
- Strongest evidence
- Biggest limitation
- One rejected model: why it failed, what assumption broke down, and what graph behavior weakened it
- What evidence would change your conclusion

How To Present It Well

Mathematical Thinking

- Explain every graph verbally.
- Avoid overclaiming: suggests, may indicate, is consistent with, we cannot rule out.
- Name your weakest assumption.
- State what evidence would change your conclusion.

Presentation Skills

- Practice transitions.
- Look at the audience, not only the screen.
- Do not read word-for-word.
- End by explaining what you now understand.

Pre-recorded Video Quality

- Use stable camera.
- Use clear audio.
- Film in good lighting.
- Make sure every member appears and speaks.

Presentation Day Checklist

- | | | | |
|---|--|--|---|
| ☐ Slides submitted or loaded | ☐ All members present / video submitted | ☐ Graph sources visible | ☐ Equations and calculations shown |
| ☐ Notebook ready if asked | ☐ Individual handwritten extensions ready | ☐ Vlogs submitted | ☐ Final claim clearly stated |
